

Professional compacting of slabs, pavers and natural stone

The perfect solution for compacting stone pavers in all kind of formats and materials.

A high capacity machine that levels and compacts stones without breaking the material or edges.

This machine has been designed specifically for the challenging task of compacting slabs, pavers and natural stone.

ROLPAV produces vibration over surfaces with exceptional ease and gentleness. The smooth mode of operation embeds the material properly, while preventing shifting, cracking or chipping of stones. It minimizes dust that usually is created from compacting polymeric jointing sands. Polyurethane rubber coated rollers protect the surface at all times.
